

Multifactor Authentication (MFA) configuration for FortiClient VPN

1. Install **FortiToken Mobile** Application from Play Store / App Store on your Mobile.

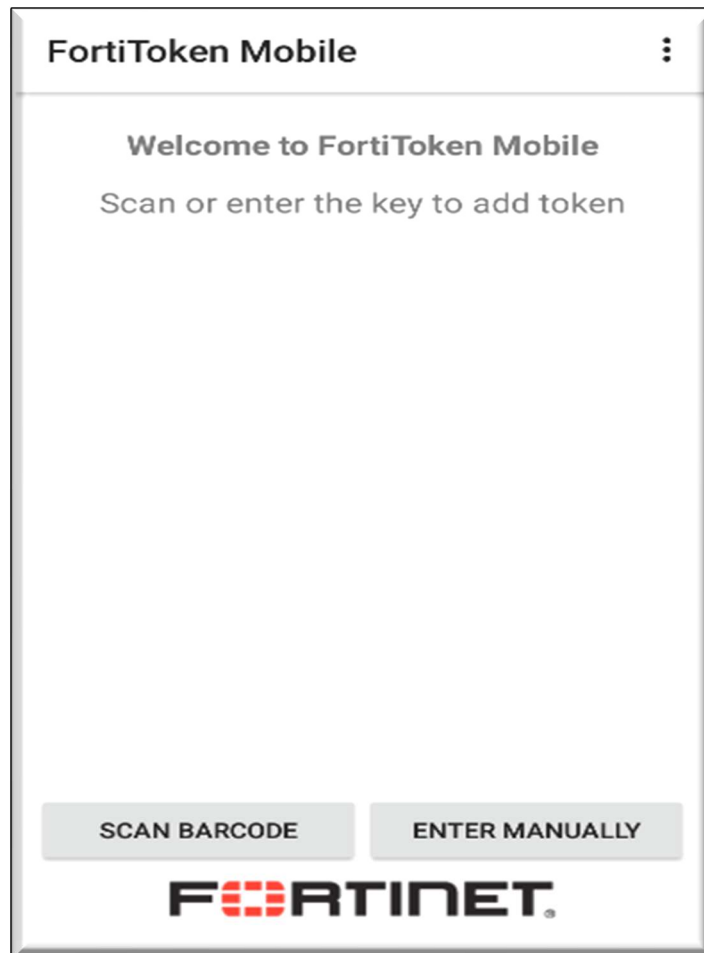

- You will receive an Email from **FAC Alerts (fac_alert@thbs.com)** to your THBS Email Account, with subject **FortiToken Mobile FTKMOBXXXXXX Activation on XX.XX.XX.XX** with a BARCODE code image attachment as shown in below. The attached BARCODE will expire within 24 hours. You need to complete the configuration within 24-hours from the email delivery.

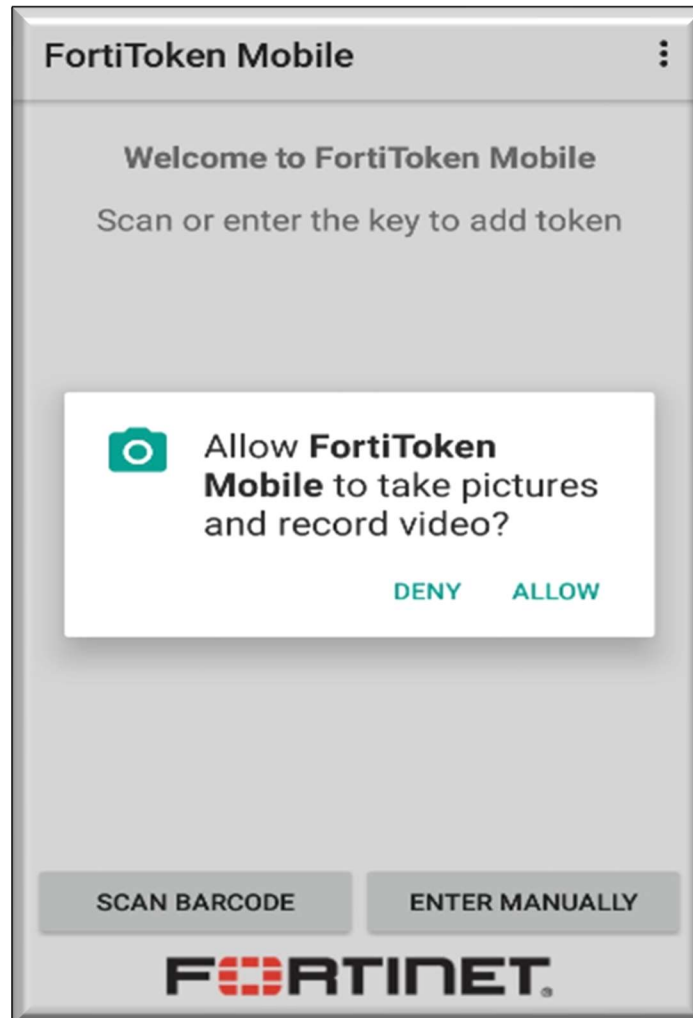

Open the BARCODE by clicking on it from the Mail on your laptop

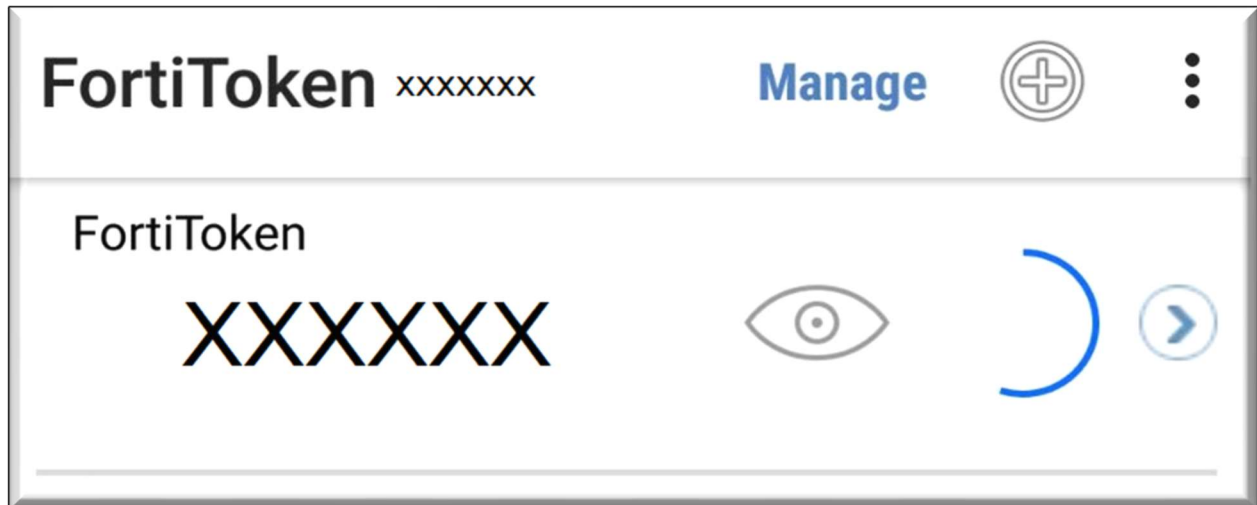

3. Open **FortiToken Application** on your Mobile. Click on **SCAN BARCODE** option on Application.

4. Allow Permissions for FortiToken Application to SCAN BARCODE via Mobile Camera.

5. Now Scan the BARCODE from Email. Post successful SCAN you will get a Token on your mobile application. You can see a 6 Digit OTP for your FortiToken which will get refresh on every 30 seconds.

6. You can also Hide/Unhide the OTP by clicking the EYE Symbol next to 6-digit Token.

7. Connect VPN as usual based on your location/Studio you login daily (ST/GV/RMZ), after 40% you will get an extra field on FortiClient client to enter Token, Now enters the 6 Digit OTP from your FortiToken Application on your Mobile and click on ok.

The image shows a FortiClient VPN connection window. At the top, there is a blue icon depicting a globe with a laptop and a padlock, connected by dotted lines. Below the icon, there are three input fields: 'VPN Name' with a dropdown menu showing 'SSL_VPN_GV/RMZ', 'Username' with the text 'abcd_efgh', and 'Password' with a masked field of dots. A blue 'Connect' button is located at the bottom center of the window.

The dialog box features a blue icon at the top center depicting a globe, a laptop, and a padlock connected by dotted lines. Below the icon are four input fields: 'VPN Name' (a dropdown menu showing 'SSL_VPN_'), 'Username' (containing 'abcd_efgh'), 'Password' (masked with asterisks), and 'Token' (empty). At the bottom are 'OK' and 'Cancel' buttons.

VPN Name	SSL_VPN_
Username	abcd_efgh
Password	*****
Token	

OK Cancel
